

METABELIAN GROUPS

- (M0) (E. I. Timoshenko, V. Shpilrain) The same as [\(F3\)](#), but for *free metabelian* groups.
- (M1) The isomorphism problem for finitely presented metabelian groups. [Background](#)
- (M2) Is the automorphism group of a free metabelian group of rank > 3 finitely presented ? [Background](#)
- (M3) (F.B.Cannonito) Is there an algorithm which decides whether or not a given finitely presented solvable group is metabelian?
- (M4) (P.Hall) Are projective groups of infinite countable rank in the class of metabelian groups free metabelian? [Background](#)
- (M5) (G.Baumslag) What can one say about the integral homology of a finitely generated metabelian group? [Background](#)
- *(M6) (V.Shpilrain) Is it true that every IA-automorphism of a free metabelian group of finite rank has a non-trivial fixed point? [Background](#)
- *(M7) (R.Goebel) Is there a group which is NOT isomorphic to the outer automorphism group of any metabelian group with a trivial centre? [Background](#)
